### BASKET BALL

#### "Red Sox" Victorious 36 to 24

Last Thursday evening P. A. lost the first game of the season to the local "Red Sox", 36 to 24. The school team put up a hard fight, but the older fellows were too heavy for them. The first period ended 9 to 7 in favor of P. A., but the Sox came back in the second period and evened the score up, 15 to 15. During the last period the Sox easily secured 21 points, while P. A. only secured 9.

The local fans have not had the pleasure of seeing five stars from the old school play together (as this combination did) for several years. P. A., this year, seems to be made up of men who see the value of team work. This attitude was shown several times during the game, when a man apparently had a good chance to star he would sacrifice his chance to a fellow player for the sake of the team. This display of team worth was notable and will make the other members of the league sit up and take notice.

The Sox also showed class as well as speed. The man from Stowe High school showed increased skill as a basket ball player since his last appearance on the local floor, probably due to his present environment. The line-up:—

P. A.	Town Team
Badger, rf	lg, Thomas
	Boardman
	rg, Merritt
	c, Burnham
	lf, Morrill
	rf, H. Best

Baskets from floor—Towne 8, Battye 2; Best 7, Burnham 3, Morrill 3, Merritt 2, Boardman 1. Fouls—Battye 4; Merritt 3, Best 1. Time, three 15 minute periods; score, 36 to 24; referee, Roy Stafford; timer, Charles Sillaway; scorer, Meacham; attendance, 150.

Manager Law has no games scheduled before January 7 but is endeavoring to obtain some before that date. The team is worthy of generous support; show your appreciation by attending the games.

### MRS. SLACK'S LETTER

#### To Mothers of Delicate Children

Palmyra, Pa.—"My little girl had a chronic cough and was so thin you could count her ribs and she had no appetite. Nothing we gave her seemed to help her, until one day Mrs. Neibert asked me to try Vinol, and now she is hungry all the time, her cough is gone, she is stouter and has a more healthy color. I wish every mother who has a delicate child would try Vinol."—Mrs. ALFRED SLACK. We guarantee Vinol, our delicious cod liver and iron tonic, to make delicate children healthy and strong.

### SEVERE RHEUMATIC PAINS DISAPPEAR

Rheumatism depends on an acid which flows in the blood, affecting the muscles and joints, producing inflammation, stiffness and pain. This acid gets into the blood through some defect in the digestive processes, and remains there because the liver, kidneys and skin are too torpid to carry it off.

Hood's Sarsaparilla, the old-time blood tonic, is very successful in the treatment of rheumatism. It acts directly, with purifying effect, on the blood, and through the blood on the liver, kidneys and skin, which it stimulates, and at the same time it improves the digestion.

#### Alaskan Timber.

In accordance with the recent act of congress, the wood needed in building the government railway in Alaska, from Seward, on the Pacific, 471 miles to Fairbanks, in the interior, will be taken free of charge from the Chugach national forest. The forest service has issued a permit to the Alaskan engineering commission to cut 85,000,000 feet of timber in designated areas along the right of way of the new railway, which will run for several miles through the Chugach national forest. Forest service employees are now marking the timber to be cut—only mature trees, the removal of which will improve the forest. That will be the largest quantity of timber ever felled in the Alaskan forests as a part of one undertaking. It will be nearly twice as large as the total quantity of timber now cut in the national forests, and annually put to local uses throughout Alaska, but only a little more than one-tenth of the estimated annual growth of the Alaskan forests. The two national forests of Alaska contain about 78,000,000,000 feet of merchantable timber, and the forest service estimates that more than 800,000,000 feet could be cut every year forever without lessening their productivity.—Youth's Companion.

#### Rushed to Mother's Defense.

When arguing the respective merits of mothers, Benny never allowed his mother to be surpassed. This attitude on Benny's part delighted mother, aged thirty-six, until one day he ran in flushed of face and belligerent of eye. "Mother," he shouted, "that guy, Bob, said his mother was forty-three years old and I couldn't stand for that, so I said you were forty-five if you were a day!"—Woman's Home Companion.

### CHARACTER TOLD BY HAND

Expert Criminologists Have by Direct Tests Proved Their Theories to Be Correct.

A French savant contends that the murderer has a distinctive hand. His face may not be hideous, but the hands always are, and self-condemnatory. Evidence on the latter characteristic is scanty, and rests upon the investigations of the French criminologists; but as to the former it is a fact that some of the most brutal murders on record have been perpetrated by men whose countenances habitually wore a very mild expression. Deeming was a pleasant man to speak to until 'crossed; but some of the authorities who examined his hands declare his broad thumb indicated the born murderer. The true ball-headed thumb gives to the first phalange a round, bulbous appearance. It is short, and the nail is so abbreviated as to suggest that it has been gnawed. It is embedded in the flesh, which rises on either side and beyond it, Dumollard, a wholesale murderer, had a hand remarkable for its thickness and length of palm in proportion to the fingers. He had a significant sign, common to most murderers—namely, the almost entire absence of lines in the palm, save the three principal—the lines of life, head and heart. These lines were very strongly defined. The line of the head—the center line extending across the palm—was violently cut by the line of life running upward from the wrist. Chironomancy interprets this to foretell a violent death. His fingers were knotty and uneven at the nail phalanges. To sum up, the signs of the murderer's hand are: Firstly, the "pouce en balle." Secondly, and only less important, the thickness of the Mount of Mars at the edge of the hand, from which flows the blood direct to the brain at the slightest motion, and causes the man to "see red." Thirdly, the scaffold sign in the severance of the "line of the head." Fourthly, the presence only in the palm of the three principal lines occasionally reduced to two, and almost always of a bright scarlet. Fifthly, crooked fingers with spatulate tips, the nails small and uneven. According to the rules of art, therefore, a murderer, if a murderer by disposition, and not (as in most cases) by accident, ought to have a hand with all, or nearly all, these characteristics.

#### His Malady.
